JUNIOR FULL STACK DEVELOPER.

React | React Native | Node.js | TypeScript

SUMMARY OF QUALIFICATIONS

Developer with hands-on experience in React and React Native, and a background as a Systems Analyst on process automation projects, combining requirements gathering, stakeholder communication, and technical feasibility with a product and business mindset. Continuously deepening full stack development skills (Node.js, TypeScript, relational and non-relational databases, software architecture, Docker), with a portfolio of complete projects from design to production deployment.

EDUCATION

- Bachelor's Degree in Software Engineering — PUC Campinas — Completed in 2024
- High School — Colégio Visconde de Porto Seguro / Integral Escolas Inteligentes

TECHNICAL SKILLS

Development: React, React Native, TypeScript, Next.js, JavaScript, Node.js, Express, APIs REST

Databases: PostgreSQL, Prisma ORM, MongoDB

Tools: Git/GitHub, Docker, CI/CD (GitHub Actions)

Additional: Scrum, Kanban, Pacote Office

PROFESSIONAL EXPERIENCE

COGNITION | Junior Systems Analyst (Full-time) | 03/2024 – 05/2025

Mid-sized company operating in the UK, Argentina, and Brazil, focused on robotic process automation (RPA). <https://cognitionhq.com/pt/home-pt/>

- Identified automation opportunities and operational efficiency gains, working directly with client companies' business areas.
- Led technical and functional requirements gathering, technical feasibility analysis, and solution proposals, presenting validations directly to clients.
- Followed the full implementation cycle, from test environment to production, using agile methodologies (Scrum) and technical communication with non-technical stakeholders.
- Deployed an average of 12 automated processes for client Recarga Pay, reducing manual task execution time and standardizing operations.

Keywords: Requirements gathering / Technical feasibility / Stakeholder communication / Scrum and Agile methodologies

SONNE GLOBAL | Internship — React Native Developer | 10/2022 – 11/2023

Strategic Planning and Marketing consultancy. <https://sonne.global/>

- Developed the front-end/mobile side of a white-label SaaS platform for corporate strategic planning, participating in functional and technical requirements gathering.

- Implemented KPI tracking features, activity management, and an integrated internal chat between team members.
- Validated interface and user experience (UI/UX), ensuring alignment between the business vision and the delivered product.

Keywords: *React Native / UI-UX / White-label projects / Requirements gathering*

MB LABS | Internship — React Native / React Developer | 09/2021 – 06/2022

Digital technology consultancy integrating strategy, design, and software engineering. <https://mblabs.com.br/>

- Developed features for mobile applications across multiple projects in different business segments, including new features, maintenance, and optimization of existing code.
- Collaborated with development teams using Scrum, actively participating in Daily Standups and Sprint Plannings, contributing to continuous deliveries aligned with client needs.
